REC'D 15 DEC 2004

WIPO PCT RO/IB

# THE UNITED STATES OF AMERICA

TO ALL TO WHOM THESE PRESENTS SHALL COME:

UNITED STATES DEPARTMENT OF COMMERCE

PCT/AB04/3375

United States Patent and Trademark Office

November 04, 2004

THIS IS TO CERTIFY THAT ANNEXED HERETO IS A TRUE COPY FROM THE RECORDS OF THE UNITED STATES PATENT AND TRADEMARK OFFICE OF THOSE PAPERS OF THE BELOW IDENTIFIED PATENT APPLICATION THAT MET THE REQUIREMENTS TO BE GRANTED A FILING DATE UNDER 35 USC 111.

APPLICATION NUMBER: 60/549,144

FILING DATE: March 03, 2004

## PRIORITY DOCUMENT

SUBMITTED OR TRANSMITTED IN  
COMPLIANCE WITH RULE 17.1(a) OR (b)

By Authority of the  
COMMISSIONER OF PATENTS AND TRADEMARKS

*N. Woodson*  
N. WOODSON  
Certifying Officer

**USE ONLY FOR FILING A PROVISIONAL APPLICATION FOR PATENT**

This collection of information is required by 37 CFR 1.51. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 8 hours to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Mail Stop Provisional Application, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

## DEVICE FOR RELEASING ADDITIVES TO PURIFIED DRINKING WATER

5

### FIELD OF THE INVENTION

The present invention is in the field of water treatment for personal use.

### BACKGROUND OF THE INVENTION

- 10        Appliances for purifying water for the purpose of human consumption are commonly used by consumers wishing to improve the quality of potable water. Such appliances contain purifying elements such as ion exchangers or active carbon contained in a container for removing contaminants or natural constituents. Water purifying appliances are either static, fixed in place or mobile.
- 15        In such appliances, the water undergo one or more steps of purification. The purification may be performed in one container or in a set of containers. When the water exits the solitary or the last treatment container it is considered at least fit for consumption.

**BRIEF DESCRIPTION OF THE DRAWINGS**

Fig. 1 is a schematic description of a water purifying devices exhibiting a receptacle of a source of chemicals;

5 Fig. 2 is a schematic description of a water purifying devices exhibiting a sectioned receptacle of a source of chemicals;

Fig. 3 is a schematic description of a water purifying devices exhibiting a sectioned concentric water purifying container and a receptacle for a source of chemicals;

10

### DESCRIPTION OF THE PRESENT INVENTION

In accordance with the present invention, a water permeable receptacle for retaining a source of additives is disposed downstream the water flow, beyond the exit point from the purification container. The source of additives controllably release into the purified water beneficial chemical agents, natural or synthetic, salts or compounds, or a combination thereof, considered as beneficial. Among such are health promoting compounds such as vitamins, minerals, medications. Other compounds which may be considered as beneficial are such that induce drinking, for preventing dehydration or excessive loss of water. Sweeteners and flavouring compositions may also be used. In Fig. 1 to which reference is now made, a water purifying apparatus is described, containing an upper input water container 22, a purifying unit 24 and a perforated receptacle for a chemical source 26. In Fig. 2 the receptacle is shown sectioned showing a source for chemical in the form of a round pill 32. Arrow 28 describes the direction of flow of water being poured into the input container.

A water purifying device described in a co-pending PCT application based on US provisional application 60/446,991, one of the inventors of which is the inventor of the present invention, contains a concentric filtering device. A device of the present invention is implemented in such a water purification container as described in Fig. 3 to which reference is now made. A receptacle 26 is shown sectioned, exposing pill 32.

**CLAIMS**

1. A water purifying appliance wherein the water undergoing  
5 purification is passed through a receptacle for retaining a source  
of at least a chemical composition.
2. A method for adding beneficial chemical agents to purified  
water, wherein a permeable receptacle disposed downstream  
10 the water flow of a water purifier, beyond the exit point from the  
purification container, releases said agents into said water flow.
